

# PALLET MULE

*RELIABLE PRODUCTS AND SERVICE*

## SINGLE FORK

- The single fork is available in three fork widths (6", 9" and 12") and any length
- Dual load wheels on 9" and 12" widths to provide added stability
- Load stabilizer caster steering, providing added stability and sharper turning radius
- Extensive use of ductile cast iron parts
- Heavy 7 gauge steel in major structural components
- Solid steel push rods instead of the standard tubular steel design
- Premium polyurethane load wheels on an aluminum core
- Sealed bearings provide reduced rolling resistance and longer life

PALLET MULE Single Fork All American Pallet Jacks are designed for moving safes, vaults and items where the width prevents the use of a standard double fork pallet truck. The load stabilizer bar and caster steering ensures easy maneuverability and proper load balance on uneven surfaces. Cast steel load wheel forks and 1/4" thick lifting surfaces provide strength and durability.

Pallet Mule All American Pallet Jacks are built heavier and more durable than the lower cost import pallet jacks to withstand the demands of continuous daily use. They are designed and built to perform safely and consistently all day every day and are supported by the most professional service and support in the industry. Don't just settle for any pallet jack!
